

IMPORTANT SAFETY NOTICE

We request all owners of the Iittala Fireplace (EAN Code: 64-2850-112051-7) to cease use of the product until further notice and contact the Iittala Group's Consumer Service Department for more information.

We have identified the following safety issue if the product is used contrary to instructions. Lighting a Fireplace when the fuel reservoir is only partially full can generate a build-up of pressure and result in ethanol being blown out of the reservoir and igniting in the air. The Iittala Group is working on a solution to prevent this happening and will update consumers in the near future.

The Fireplace has been sold at Iittala stores and by large retailers since September 1, 2008. We apologise for any inconvenience and are doing our utmost to ensure maximum consumer safety.
